**1<sup>ST</sup> APRIL 2024 (Revised mid April)**

Dear Orchid Friends and Customers,

The days are getting shorter but I must admit that here in George we can't complain, we really have had a good summer this year. Sometimes temperatures even hotter than Cape Town! We had plenty of rain last year, well over 1,000mm which is above average.

I am pleased to be able to advertise a PLANT SALE of many items on the list with discounts of up to 40%. All discounted plants have their prices in **RED**. A number of them are species and many of them have only a few plants left. Do be sure to ask me first what is available on your order and I will let you know. I will be placing one or two large orders with vendors who are coming to the National Show at the end of September this year so expect some exciting new plants on the October list.

There are a few left of the more common Phragmipedium divisions and I have added a few more of my Paphiopedilum divisions. Throughout the list are one-off plants which are available, all from my own collection. Now that I have moved to the suburbs, I no longer have space to expand so I am eventually having to contract in order to purchase more plants. You are welcome to request a photo of any of these larger plants which I can send on What's App.

Please note that I am having great success with growing a number of genera in Air Pots so I have decided to stock and sell them. I know that they are expensive but the results speak for themselves. Photo and prices within the list on page 40.

My new complex Paphiopedilums are looking good and all rooted and ready for their new homes. All are blooming size for 2024. More will arrive at the end of this year.

I am still only open to the public on a Wednesday morning from 10am – 1pm, otherwise by appointment. Address is 34 Napier Str, Blanco, George. I have included another email address in the details above if needed - [stellrsa@mweb.co.za](mailto:stellrsa@mweb.co.za).

Happy growing!! I hope to see some of my customers in KwaZulu Natal end of year. If we drive up, I am happy to bring orders with.

Suitable for all Cattleyas and most Dendrobiums. Mostly for genera that like lots of air around their roots. So far I have mini and full sized Cattleyas, Dendrobium nobile, tortile and others, Dendrobium usitae and similar, Dendrobium phalaenopsis types, Eria hyacinthoides is doing well. Its fun to try something different! Comments so far, are what am I going to do when I repot? Well, I will cross that bridge when I have to! At present the roots are so good I am delighted!

## DENDROBIUM SPECIOSUM var. 'Woodcroft'

This photo is just to show you what can be done with a *Dendrobium speciosum*.

This plant was imported from Australia 30 years ago and photographed in my shaded area in September 2014 with Robert looking on. Second photo taken in

2016 before our spring show – transported in a builder's lorry!

It received an Award of Cultural Merit at the Orchid Soc. of the Southern Cape Spring Show.

Babies are growing! Available next spring...
